A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5-7 and 12-14 are rejected under 35 U.S.C. 102 (b) as being anticipated by Koyama et al.. Koyama et al. Teach the use of retinoids and their nuclear receptors (RARs) play a critical role for the completion of chondrocyte maturation and endochondral bone formation. The above reference makes clear that such compounds can be used inherently for healing of bone fracture or other bone disorders.
